Preface

One of the primary responsibilities of the Puerto Rico Planning Board is to provide students, consultants, entrepreneurs, and other interested parties the most complete coverage of Puerto Rico's external trade statistics. The Bureau of Economic Analysis has been publishing since fiscal year 1994 **Estadísticas Seleccionadas del Comercio Exterior de Puerto Rico** (Selected Statistics on Puerto Rico's External Trade), an interesting and successful publication comprising the Island's external trade data by country, geographic region, tariff treatment, industrial classification, and other arrangements. With the reassumption of the **External Trade Statistics** series, we move one step further in this objective. This edition covers Puerto Rico's exports and imports of recorded merchandise by commodity for fiscal year 1993, in a format easy to read.

We acknowledge the collaboration of the Foreign Trade Division of the U.S. Bureau of the Census, which provides the monthly external trade statistics enabling the preparation of this publication. Also, we appreciate the cooperation of the Area of Information Systems, and the Division of Auxiliary Services of the Puerto Rico Planning Board.

PUERTO RICO' S EXTERNAL TRADE DATA SYSTEM AND DEFINITIONS

Introduction

The external trade data system of Puerto Rico incorporates all transactions of merchandise between Puerto Rico and the United States, the U.S. Virgin Islands, and foreign countries. The U.S. Bureau of the Census compiles this information. Currently, the Bureau of Economic Analysis of the Puerto Rico Planning Board receives the information monthly by electronic media, containing detailed statistics of the transactions by commodities, means of transportation, weight, value, quantity, and country. This data is processed according to our specific needs of information in different types of tabulations. There are three basic geographic classifications: United States, foreign countries, and the U.S. Virgin Islands. Puerto Rico is included within the U.S. Customs and tariff systems. The Puerto Rico Trade Data Office, under the U.S. Bureau of the Census, began operations in January 1992. It guides and clarifies companies in Puerto Rico on the necessary proceedings in the shipment of merchandise to the United States and foreign countries.

Shipments between Puerto Rico and the United States

The statistics are obtained from a special form required to all companies, known as a Shipper's Export Declaration form (SED). For shipments from Puerto Rico to the United States, this form must be submitted to one of the U.S. Customs offices in San Juan, Ponce or Mayagüez. At the same time, a similar form must accompany all shipments from the U.S. to Puerto Rico. The value is based on the transaction price including inland freight, insurance and other charges to the border point or seaport. It is classified as free alongside ship (FAS) value at the port of embarkation. It should not include ocean freight, marine insurance, or other charges incurred beyond the port of embarkation.

Trade with foreign countries

The information on exports from Puerto Rico is obtained from the SED's filed out by the exporters at the port of embarkation. The value of the shipment is based on the transaction price including inland freight, insurance, and other charges to the place of embarkation. Merchandise in transit shipped through Puerto Rico from one foreign country to another is not considered as an export. Imported merchandise which has cleared customs and which is re-exported without further processing, is classified separately as exports of foreign merchandise, but included as part of exports and classified according to the official schedules.

Country of destination is defined as the place where the merchandise is to be consumed or used, either in further processing or final manufacturing. In the event the exporter does not have enough or definite information as to the ultimate destination of the shipment, it is credited for statistical purposes to the country to which it is consigned.

In the case of imports for direct consumption, the information is based on regular U.S. Custom's entries of merchandise filed out by the importers at one of the U.S. Customs Offices in San Juan, Ponce or Mayagüez. It includes imports for direct consumption plus withdrawals from bonded warehouses,

government as well as non-governmental shipments of merchandise from foreign countries. U.S. goods returned by the U.S. Armed Forces for their own use are excluded. Since 1982, import data is presented in terms of customs value, defined as the price paid for merchandise exported to the U.S., excluding U.S. import duties, freight, insurance and other charges incurred in bringing the merchandise to the United States. Before 1982, import data was presented as FAS value, which was defined as the transaction value of imports at the foreign port of embarkation.

Shipments between Puerto Rico and the U.S. Virgin Islands

In the case of exports to the U.S. Virgin Islands, the information comes from the SED's filed at the U.S. Customs Office at the time the merchandise is shipped. Shipments by all means of transportation are included. The value is based on the transaction price including inland freight, insurance, and other charges to the place of shipment.

In the case of imports the information is based on the import entry form which importers are required to file at the U.S. Customs Office in San Juan. The value shown is the customs value, which is the value of imports as appraised by U.S. Customs. Commodity information is reported according to the classification schedules of the U.S. Department of Commerce.

Classifications

As part of the U.S. Customs system, the commodity classification systems used are the same as in the U.S. Schedule B for exports and imports to/from the United States, and the Harmonized Tariff Schedule Annotated for imports from foreign countries. Both systems are based on the Harmonized Commodity Description and Coding System. In addition, the Puerto Rico Planning Board classifies Puerto Rico' s exports and imports according to the Standard Industrial Classification (SIC) system. This provides an additional mean for comparing with local production and other economic statistics. This is the basic classification used in the published reports. They are also classified on the basis of the Harmonized System (HS). Since January 1994 the monthly data of exports and imports is also classified on a SIC basis.

Sources of information of external trade statistics

The annual report **External Trade Statistics** is the basic publication in which Puerto Rico's trade data is presented to the public. It presents a detailed set of statistics by commodity and country using the HS. Summary tables by SIC and other classifications for each fiscal year are included in the **Statistical Appendix of the Economic Report to the Governor**, the **Selected Statistics on Puerto Rico's External Trade** and in other publications. In addition, there are internal reports or tabulations in which trade is classified by region or commodity (using the HS, Schedule B, and SIC classifications), by geographic area or by country, and presented in a monthly and accumulated form. This information is maintained in the Area of Information Systems of the Planning Board. The reports are generated as needed. The published information is on a fiscal year basis.

Although there is no on line access for external users, we have the capability of transferring information, tailored to particular requests, to floppy disks or diskettes, or to magnetic tapes on a cost basis. Printouts can also be provided on a cost basis.
