PREFACIO

La Junta de Planificación de Puerto Rico publica anualmente el **Apéndice Estadístico** como un adelanto de la información estadística disponible más adelante en el **Informe Económico a la Gobernadora**. Este **Apéndice Estadístico del Informe Económico a la Gobernadora 2003** contiene las cifras socioeconómicas de Puerto Rico más importantes para el año fiscal 2003 así como de años previos.

Esta publicación está dividida en tres secciones. La primera incluye 34 tablas con información desde los años fiscales 1994 a 2003. Para un mejor entendimiento de la trayectoria histórica de las principales variables, se incluye además una segunda sección con 32 gráficas, así como una tercera con 26 tasas de crecimiento.

Para esta publicación continuamos el ciclo iniciado en la edición del 2002 con respecto a información de acuerdo al Sistema de Clasificación Industrial de América del Norte (NAICS, por sus siglas en inglés). El **Apéndice Estadístico del Informe Económico a la Gobernadora 2003** incluye clasificación por NAICS en las tablas 23 y 24 (comercio exterior), así como en la tabla 34 (número de personas empleadas en establecimientos). Para aquellos interesados en NAICS, especialmente en los factores que motivaron la necesidad de un cambio substancial del sistema vigente de clasificación industrial, las nuevas industrias, así como la comparación histórica entre SIC y NAICS, ver el capítulo sobre NAICS en el **Informe Económico al Gobernador 1999**. Además, puede consultar nuestra publicación **Estadísticas Seleccionadas del Comercio Exterior de Puerto Rico 2003**.

Agradecemos a las entidades públicas y privadas que proveyeron los datos utilizados para preparar este apéndice estadístico, y exhortamos a los usuarios a ampliar su respectivo análisis económico y social de la Isla con el **Informe Económico a la Gobernadora 2003**.

PREFACE

Each year, the Puerto Rico Planning Board publishes the ***Statistical Appendix of the Economic Report to the Governor*** *as an advance of the statistical information later available at the* ***Economic Report to the Governor****. This* ***Statistical Appendix of the Economic Report to the Governor 2003*** *contains Puerto Rico's most important socioeconomic figures for fiscal year 2003 as well as previous years.*

This publication is divided into three sections. The first one includes 34 tables with information from fiscal years 1994 through 2003. For a better understanding of the of the main variables' historical trend, we also include a second section with 32 graphs, plus a third one with 26 growth rates.

For this publication we continue the cycle began in the 2002 edition with regards to information according to the North American Industrial Classification System (NAICS). This ***Statistical Appendix of the Economic Report to the Governor 2003*** *includes NAICS classification in tables 23 and 24 (external trade), as well as table 34 (number of employed persons in establishments). For those interested NAICS, especially the issues leading to the need for a substantial change of the current industrial classification system, the new industries, as well as a historical comparison between SIC and NAICS, see the chapter on NAICS at the* ***Economic Report to the Governor 1999****. Also, you may consult our publication* ***Selected Statistics on Puerto Rico's External Trade 2003****.*

We acknowledge the public agencies and private organizations, which provided the information, used in the preparation of this report, and we urge users to broaden their respective economic and social analysis of Puerto Rico with the ***Economic Report to the Governor 2003****.*

APENDICE ESTADISTICO • *STATISTICAL APPENDIX*

r- Cifras revisadas.
p- Cifras preliminares.
(1) Deflacionado por el índice implícito de precios para deflacionar los gastos de consumo personal.
(2) El número de familias aquí utilizado es producto de la división de la población total entre el promedio de personas por familia. Para propósitos del censo de población, una familia consiste de un jefe de hogar y una persona o más que viven en el mismo hogar y están emparentados con el jefe del hogar por nacimiento, matrimonio o adopción.
(3) Departamento del Trabajo y Recursos Humanos, Negociado de Estadísticas, Encuesta de Vivienda.
(4) Se obtiene dividiendo el producto bruto interno a precios constantes entre el empleo total.
(5) 1984=100.
(6) Promedio de los estimados de la población al principio y al final del año fiscal.

Fuente: Junta de Planificación, Programa de Planificación Económica y Social, Subprograma de Análisis Económico.

r- Revised figures.
p- Preliminary figures.
(1) Deflated by implicit price deflators for personal consumption expenditures.
(2) The number of families used here represents the division of the total population by the average number of persons per family. For the purpose of the population census, a familly consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage or adoption.
(3) Department of Labor and Human Resources, Bureau of Statistics, Household Survey.
(4) Obtained from the division of gross domestic product at constant prices by total employment.
(5) 1984=100.
(6) Average of population estimates at the beginning and end of the fiscal year.

r- Cifras revisadas.
p- Cifras preliminares.
(1) Desde 1983 se incluyen los préstamos en compañías de fideicomiso con poderes de banco. Para los años desde el 1997 al 1999 los datos reflejan cambios debido a disminuciones en los balances acumulados y a reclasificaciones de préstamos personales a préstamos hipotecarios.
(2) Desde 1995 se incluyen sólo dos bancos federales de ahorro. Estos pasaron a ser bancos comerciales en 1999.
(3) No incluye todas las tarjetas de crédito.

r- Revised figures.
p- Preliminary figures.
(1) Since 1983 the loans in trust companies with banking powers have been included. For years 1997 to 1999, there are changes in these figures due to lower accrued balances and changes in classification of personal loans to morgtage loans.
(2) Since 1995 only two federal saving banks are included. They became commercial banks in 1999.
(3) Does not include all credit cards.

TASAS DE CRECIMIENTO
RATES OF GROWTH

INTERPRETACION DE LOS CUADROS DE TASAS DE CRECIMIENTO ANUAL

Esta sección del **Apéndice Estadístico del Informe Económico a la Gobernadora de 2003** incluye cuadros con las tasas de crecimiento para los años fiscales 1980 al 2003 correspondientes a las siguientes variables económicas:

1. producto bruto
2. producto bruto per cápita
3. gastos de consumo personal
4. gastos de consumo personal per cápita
5. gastos de consumo personal de bienes duraderos
6. gastos de consumo personal de bienes no duraderos
7. gastos de consumo personal de servicios
8. gastos de consumo del gobierno
9. inversión interna bruta de capital fijo
10. inversión en construcción
11. inversión en construcción de vivienda privada
12. inversión en maquinaria y equipo
13. producto bruto interno
14. producto bruto interno per cápita
15. ingreso personal
16. ingreso personal per cápita
17. ingreso personal disponible
18. ingreso personal disponible per cápita
19. ingreso neto
20. ingreso neto per cápita
21. índice implícito de precios para deflacionar el producto bruto
22. índice implícito de precios para deflacionar los gastos de consumo personal
23. empleo
24. desempleo
25. población
26. deuda pública bruta

Los cuadros para estas variables se presentan a precios corrientes y constantes en los casos donde corresponda. Cada uno de éstos contiene las tasas de crecimiento anual para dos años en específico, cualesquiera que éstos sean para la serie presentada en esta publicación. Los cuadros están divididos por una línea diagonal formando dos triángulos. Las tasas de crecimiento a precios corrientes se presentan en el triángulo inferior y las tasas de crecimiento a precios constantes en el triángulo superior. La ventaja de este ordenamiento es que permite comparar directamente, entre dos años dados, la tasa de crecimiento monetario con la tasa de crecimiento real de una determinada variable macroeconómica.

El cuadro se lee igual que el sistema de coordenadas cartesianas. Tanto en el eje de las abscisas (eje horizontal) como en el de las ordenadas (eje vertical) aparecen los años. En el punto o celda de intersección de dos años dados aparece la tasa de crecimiento para el periodo.

Si se interesa obtener la tasa de crecimiento de una variable a precios corrientes entre dos años dados, se busca primeramente en el eje vertical el año más reciente y se mueve en dirección horizontal hacia la derecha, hasta encontrar la intersección con el otro año. El valor que aparece en la celda de intersección es la tasa de crecimiento monetario durante el periodo. En cambio, si lo que se interesa es obtener la tasa de crecimiento a precios constantes de la misma variable, se busca primeramente en el eje horizontal (en el tope del cuadro) el año mas reciente y se mueve en dirección vertical, hasta encontrar la intersección con el otro año. De este modo, se obtiene la tasa de crecimiento real durante el periodo. Por ejemplo, la tasa de crecimiento anual del producto bruto a precios corrientes en el periodo de 1987 al 1995 fue de 6.5 por ciento. En cambio, la tasa de crecimiento a precios constantes de esa variable en el mismo periodo fue de 2.7 por ciento. Al realizar el procedimiento conviene recordar que se debe partir del año más reciente.

INTERPRETATION OF THE ANNUAL GROWTH RATES TABLES

This section of the **Statistical Appendix of the Economic Report to the Governor 2003** includes growth rates tables for fiscal years 1980 hrough 2003, corresponding to the following economic variables:

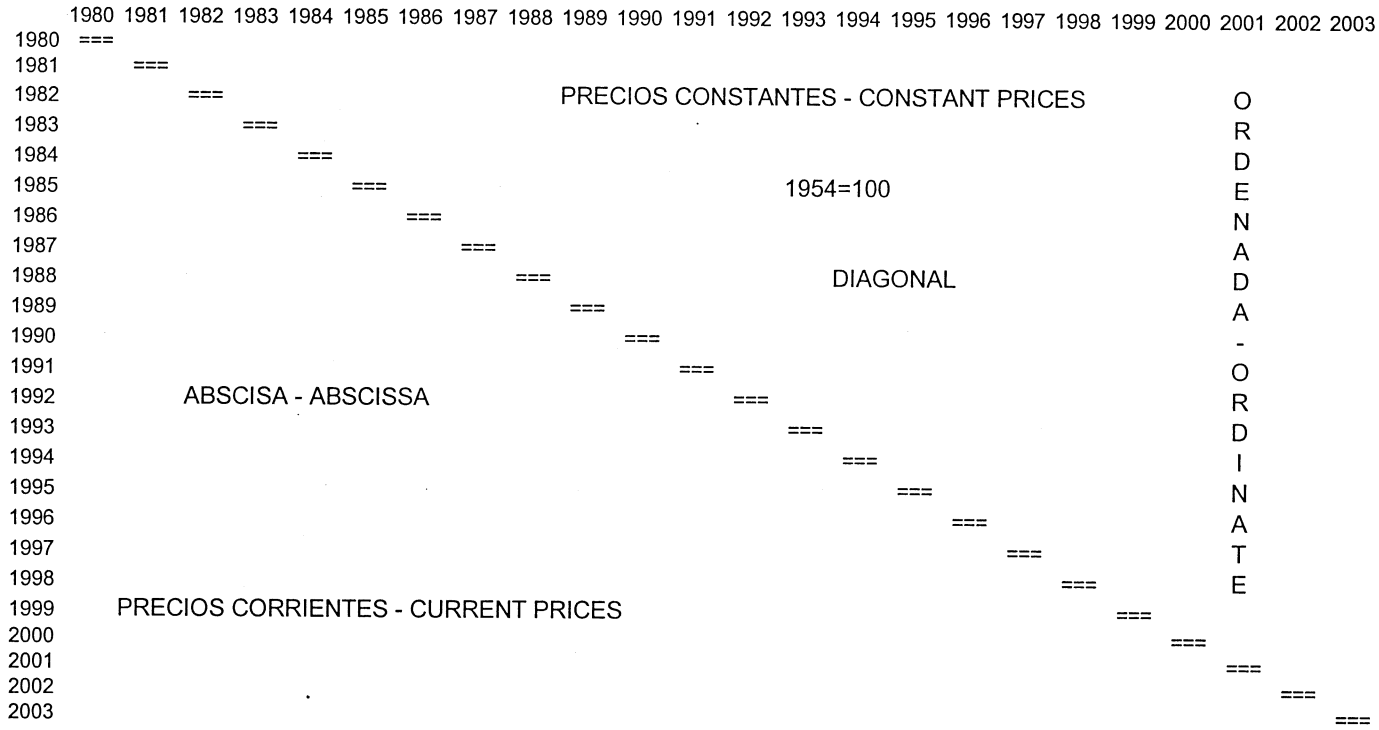

1. gross product
2. per capita gross product
3. personal consumption expenditures
4. per capita personal consumption expenditures
5. personal consumption expenditures of durable goods
6. personal consumption expenditures of non durable goods
7. personal consumption expenditures of services
8. government consumption expenditures
9. gross fixed domestic investment
10. construction investment
11. private housing construction investment
12. machinery and equipment investment
13. gross domestic product
14. per capita gross domestic product
15. personal income
16. per capita personal income
17. disposable personal income
18. per capita disposable personal income
19. net income
20. per capita net income
21. implicit price deflators for gross product
22. implicit price deflators for personal consumption expenditures
23. employment
24. unemployment
25. population
26. gross public debt

The tables for these variables are presented at current and constant prices where applicable. Each one of these contains the annual growth rates for specifically two years, whichever they are for the series presented in this publication. The tables are divided by a diagonal line forming two triangles. The growth rates at current prices are at the lower triangle and the growth rates at constant prices are at the upper triangle. The advantage of this layout is that it permits a direct comparison, between two years, of the nominal growth rate with the real growth rate of a determined macroeconomic variable.

The table is read the same as in Cartesian coordinates. The years appear at both the abscissas axis (horizontal axis) as well as that of the ordinates (vertical axis). At the intersection point or cell for two given years, the growth rate for such period appears.

If it is interested in obtaining a variable's growth rate at current prices between two given years, first look at the vertical axis for the most recent year and move towards horizontally to the right, until the other year's intersection is found. The value appearing at the intersection cell is the nominal growth rate during such period. On the other hand, if it is interested in obtaining the constant growth rate for the same variable, look first the horizontal axis (at the top of the table) of the most recent year and move in a vertical direction, until the intersection with the other year is found. Hence, the real growth rate during such period is obtained. For example, the gross product's annual growth rate at current prices for the period of 1987 through 1995 was 6.5 percent. On the other hand, the growth rate at current prices for such variable during the same period was 2.7 percent. While doing the procedure it is convenient to remember that you must start from the most recent year.
