PREFACIO

La Junta de Planificación de Puerto Rico publica anualmente el **Apéndice Estadístico** como un adelanto de la información estadística disponible más adelante en el **Informe Económico al Gobernador**. Este **Apéndice Estadístico del Informe Económico al Gobernador 2006** contiene las cifras socioeconómicas de Puerto Rico más importantes para el año fiscal 2006 así como de años previos.

Esta publicación está dividida en tres secciones. La primera incluye 34 tablas con información desde los años fiscales 1997 a 2006. Para un mejor entendimiento de la trayectoria histórica de las principales variables, se incluye además una segunda sección con 32 gráficas, así como una tercera con 26 tasas de crecimiento.

Agradecemos a las entidades públicas y privadas que proveyeron los datos utilizados para preparar este apéndice estadístico, y exhortamos a los usuarios a ampliar su respectivo análisis económico y social de la Isla con el **Informe Económico al Gobernador y a la Asamblea Legislativa 2006**.

PREFACE

Each year, the Puerto Rico Planning Board publishes the **Statistical Appendix of the Economic Report to the Governor** as an advance of the statistical information later available at the **Economic Report to the Governor**. This **Statistical Appendix of the Economic Report to the Governor 2006** contains Puerto Rico's most important socioeconomic figures for fiscal year 2006 as well as previous years.

This publication is divided into three sections. The first one includes 34 tables with information from fiscal years 1997 through 2006. For a better understanding of the of the main variables' historical trend, we also include a second section with 32 graphs, plus a third one with 26 growth rates.

We acknowledge the public agencies and private organizations, which provided the information, used in the preparation of this report, and we urge users to broaden their respective economic and social analysis of Puerto Rico with the **Economic Report to the Governor and to the Legislative Assembly 2006**.

INTERPRETACION DE LOS CUADROS DE TASAS DE CRECIMIENTO ANUAL

Esta sección del **Apéndice Estadístico del Informe Económico al Gobernador y a la Asamblea Legislativa 2006** incluye cuadros con las tasas de crecimiento para los años fiscales 1983 al 2006 correspondientes a las siguientes variables económicas:

- | | |
|--|---|
| 1. producto nacional bruto | 15. ingreso personal |
| 2. producto nacional bruto per cápita | 16. ingreso personal per cápita |
| 3. gastos de consumo personal | 17. ingreso personal disponible |
| 4. gastos de consumo personal per cápita | 18. ingreso personal disponible per cápita |
| 5. gastos de consumo personal de bienes duraderos | 19. ingreso nacional neto |
| 6. gastos de consumo personal de bienes no duraderos | 20. ingreso nacional neto per cápita |
| 7. gastos de consumo personal de servicios | 21. índice implícito de precios para deflacionar el producto nacional bruto |
| 8. gastos de consumo del gobierno | 22. índice implícito de precios para deflacionar los gastos de consumo personal |
| 9. inversión interna bruta de capital fijo | 23. empleo |
| 10. inversión en construcción | 24. desempleo |
| 11. inversión en construcción de vivienda privada | 25. población |
| 12. inversión en maquinaria y equipo | 26. deuda pública bruta |
| 13. producto interno bruto | |
| 14. producto interno bruto per cápita | |

Los cuadros para estas variables se presentan a precios corrientes y constantes en los casos donde corresponda. Cada uno de éstos contiene las tasas de crecimiento anual para dos años en específico, cualesquiera que éstos sean para la serie presentada en esta publicación. Los cuadros están divididos por una línea diagonal formando dos triángulos. Las tasas de crecimiento a precios corrientes se presentan en el triángulo inferior y las tasas de crecimiento a precios constantes en el triángulo superior. La ventaja de este ordenamiento es que permite comparar directamente, entre dos años dados, la tasa de crecimiento monetario con la tasa de crecimiento real de una determinada variable macroeconómica.

El cuadro se lee igual que el sistema de coordenadas cartesianas. Tanto en el eje de las abscisas (eje horizontal) como en el de las ordenadas (eje vertical) aparecen los años. En el punto o celda de intersección de dos años dados aparece la tasa de crecimiento para el periodo.

Si se interesa obtener la tasa de crecimiento de una variable a precios corrientes entre dos años dados, se busca primeramente en el eje vertical el año más reciente y se mueve en dirección horizontal hacia la derecha, hasta encontrar la intersección con el otro año. El valor que aparece en la celda de intersección es la tasa de crecimiento monetario durante el periodo. En cambio, si lo que se interesa es obtener la tasa de crecimiento a precios constantes de la misma variable, se busca primeramente en el eje horizontal (en el tope del cuadro) el año más reciente y se mueve en dirección vertical, hasta encontrar la intersección con el otro año. De este modo, se obtiene la tasa de crecimiento real durante el periodo. Por ejemplo, la tasa de crecimiento anual del producto bruto a precios corrientes en el periodo de 1987 al 1995 fue de 6.5 por ciento. En cambio, la tasa de crecimiento a precios constantes de esa variable en el mismo periodo fue de 2.7 por ciento. Al realizar el procedimiento conviene recordar que se debe partir del año más reciente.

INTERPRETATION OF THE ANNUAL GROWTH RATES TABLES

This section of the **Statistical Appendix of the Economic Report to the Governor and to the Legislative Assembly 2006** includes growth rates tables for fiscal years 1983 through 2006, corresponding to the following economic variables:

- | | |
|--|--|
| <ol style="list-style-type: none"> 1. gross national product 2. per capita gross national product 3. personal consumption expenditures 4. per capita personal consumption expenditures 5. personal consumption expenditures of durable goods 6. personal consumption expenditures of non durable goods 7. personal consumption expenditures of services 8. government consumption expenditures 9. gross fixed domestic investment 10. construction investment 11. private housing construction investment 12. machinery and equipment investment 13. gross domestic product | <ol style="list-style-type: none"> 14. per capita gross domestic product 15. personal income 16. per capita personal income 17. disposable personal income 18. per capita disposable personal income 19. net national income 20. per capita net national income 21. implicit price deflators for gross national product 22. implicit price deflators for personal consumption expenditures 23. employment 24. unemployment 25. population 26. gross public debt |
|--|--|

The tables for these variables are presented at current and constant prices where applicable. Each one of these contains the annual growth rates for specifically two years, whichever they are for the series presented in this publication. The tables are divided by a diagonal line forming two triangles. The growth rates at current prices are at the lower triangle and the growth rates at constant prices are at the upper triangle. The advantage of this layout is that it permits a direct comparison, between two years, of the nominal growth rate with the real growth rate of a determined macroeconomic variable.

The table is read the same as in Cartesian coordinates. The years appear at both the abscissas axis (horizontal axis) as well as that of the ordinates (vertical axis). At the intersection point or cell for two given years, the growth rate for such period appears.

If it is interested in obtaining a variable's growth rate at current prices between two given years, first look at the vertical axis for the most recent year and move towards horizontally to the right, until the other year's intersection is found. The value appearing at the intersection cell is the nominal growth rate during such period. On the other hand, if it is interested in obtaining the constant growth rate for the same variable, look first the horizontal axis (at the top of the table) of the most recent year and move in a vertical direction, until the intersection with the other year is found. Hence, the real growth rate during such period is obtained. For example, the gross product's annual growth rate at current prices for the period of 1987 through 1995 was 6.5 percent. On the other hand, the growth rate at current prices for such variable during the same period was 2.7 percent. While doing the procedure it is convenient to
