

Public Notice

**Application for Federal Consistency Certification with the
Puerto Rico Coastal Zone Management Program
CZ-2021-1209-041
PR Coastal Study Feasibility Report
Punta Las Marías, Ocean Park, El Condado y Rincón**

The PR Planning Board (PRPB) is evaluating the Federal Consistency Determination emitted by the United States Army Corps of Engineers (USACE) for the feasibility report at reference. This feasibility report considers alternatives for the management of erosion and other coastal risks in certain areas of Puerto Rico. The PRPB issued a public notice on February 5, 2021 that contains a summary of the alternatives that are being considered by the USACE as a possible intervention for the following areas coastal areas:

Municipality	Coastal Sector	Limits
San Juan	Condado Pocket Beach	From Ventana Al Mar park to Cervantes street.
	Punta Piedrita Headland	Beach area from Cervantes Street to "Parque del Indio".
	Ocean Park Pocket Beach	From Parque del Indio to the east side of the recreative area of Park Boulevard Residential Building.
	Punta Las Marías Headland	From Park Boulevard building to Punta Las Marías.
Rincón	Rincon B	From the river mouth of Quebrada Los Ramos in Corcega Beach to Sunfish Beachfront Building.

Copy of the public notice and the PR Coastal Study Feasibility Report documents are available at the PRPB web page. It can be accessed through www.jp.pr.gov under "**Compatibilidad Federal**". The PRPB invites citizens, government agencies, private entities, and the general public to provide information and express their comments and recommendations regarding the alternatives that are being considered by the USACE in this feasibility study. The PRPB grants until **February 22, 2021** to submit comments. All comments in relation to this matter must be filed by e-mail to comentariosjp@jp.pr.gov, please refer to the case number CZ-2021-1209-041.
