

PLANES DE MITIGACIÓN CONTRA PELIGROS NATURALES

Resiliencia Planificada

JUNTA DE PLANIFICACIÓN

2021

Municipality of Trujillo Alto

Natural Hazard Mitigation Plan

Executive Summary

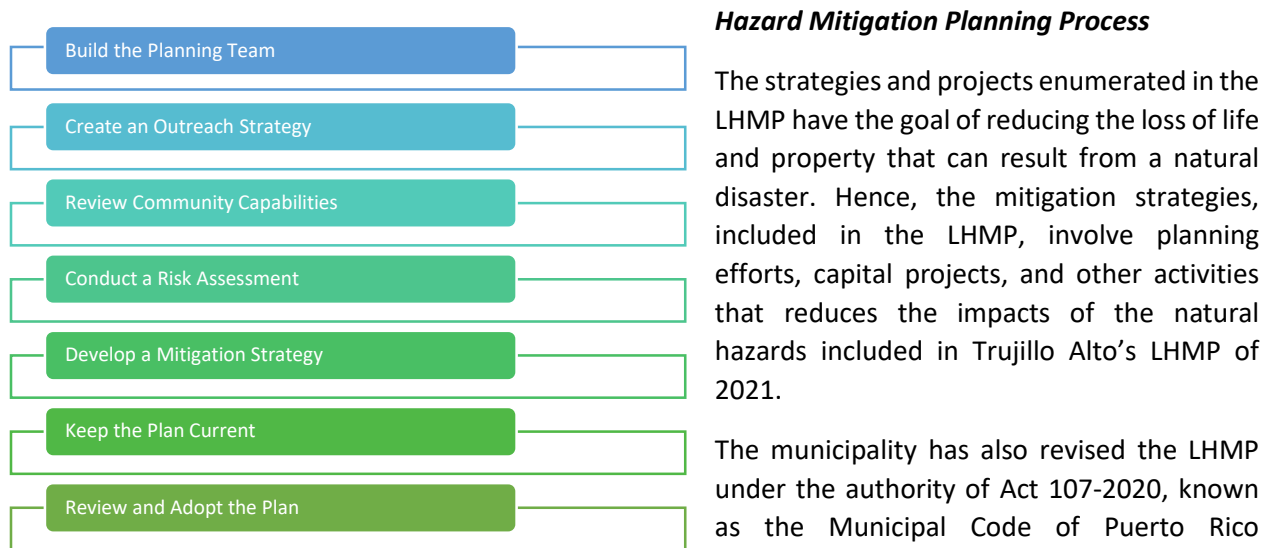

1 Introduction

The Municipality of Trujillo Alto has revised its Local Hazard Mitigation Plan (LHMP)¹ in accordance with the federal Disaster Mitigation Act of 2000 (DMA2K), which was signed into law to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act of 1988. One of the requirements that this legislation establishes is that in order for the municipality to receive federal mitigation funds, it must elaborate and adopt a Federal Emergency Management Administration (FEMA) approved LHMP.² Also, the DMA2K promotes that the local government, together with the State, work on pre disaster planning and encourages the development of sustainable hazard mitigation activities.

These LHMPs must be revised and updated every five (5) years to remain in compliance with regulations and Federal mitigation grant conditions. This updating requirement offers the municipality an opportunity to reevaluate recommendations, monitor the implementation of mitigation strategies included in the previous Plan, monitor the impact of mitigation actions that have been implemented, and determine if any changes to the Plan need to be incorporated. This Plan complies with said regulations.

Figure 1: Hazard Mitigation Planning Process

Municipalities Act of 1991. Section 1.010 of said Act, *supra* (former section 2.004 of Act 81-1991), states that the municipality can carry out any activity that establish programs or adopt convenient and useful measures to prevent and fight fires, aid the community in cases of emergency or natural disasters, catastrophic accidents of fires and for the civil protection in general.

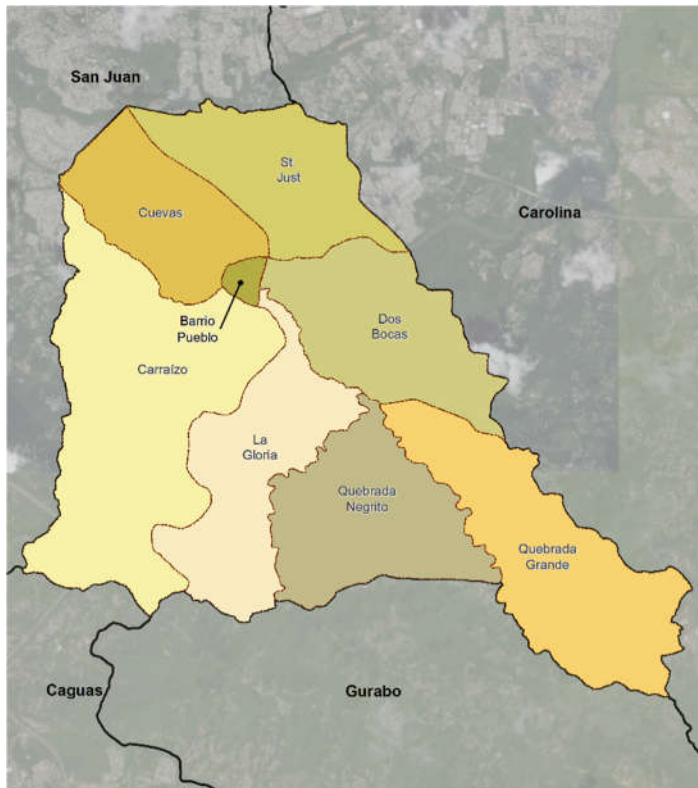

¹ Please note that the 2021 Revised HMP was written in Spanish as per agreement between the Municipality, the Planning Board, the Governor’s Authorized Representative (GAR) and FEMA.
² 42 U.S.C 5165; 44 C.F.R. § 201.6.

This Executive Summary will provide an overview on:

- Trujillo Alto's population characteristics;
- The public participation and outreach efforts with the community during the LHMP planning process;
- Trujillo Alto's risk assessment;
- A review of the mitigation strategies, goals and LHMPs action plan; and
- Plan maintenance, and how to keep the Plan current.

2 Trujillo Alto's Profile: Main Population Characteristics

Figure 2: Trujillo Alto and its wards

The Municipality of Trujillo Alto is located in the northeast center of Puerto Rico. Its northern border is the Municipality of San Juan, to the southwest is the Municipality of Caguas, to the south is the Municipality of Gurabo, and to the east is the Municipality of Carolina. The Municipality of Trujillo Alto has a territorial area of approximately 21 square miles (56 square kilometers).

The Puerto Rico Planning Board, according to the most recent area delimitation, divides the island into eleven areas, grouping the different municipalities by their demographic trends and human settlements, infrastructure endowment, socioeconomic variables, sociodemographic characteristics, internal cohesion, and the resources and development potential of each. The Functional Area of San Juan, to which the Municipality of Trujillo Alto belongs, is composed of the municipalities of Bayamón, Caguas, Canóvanas, Carolina,

Cataño, Corozal, Dorado, Guaynabo, Loíza, Naranjito, San Juan, Toa Alta, Toa Baja, Trujillo Alto and Vega Baja.

The municipality has eight (8) official *barrios* or wards: Carraízo, Cuevas, Dos Bocas, La Gloria, Quebrada Grande, Quebrada Negrito, St. Just y Pueblo.

In hydrographic terms, its most important feature is the Grande de Loíza River, which crosses the Municipality from south to north and surrounds the Pueblo ward on three (3) sides. The Carraízo reservoir is located in the southeast of the Municipality, a major source of water for the Municipality and other municipalities in the area.

Table 1: Population by age group: 2010 and 2018

Population	2010 Census	2018 ACS estimate	% Rate of Change
Younger than 5 years age	4,740	2,991	-36.90%
5 to 19 years of age	16,210	12,897	-20.44%
20 to 64 years of age	44,235	40,060	-9.44%
65 years of age and older	9,657	11,832	22.52%
Total	74,842	67,780	-9.44%

Source: US Census Bureau, Census 2010; American Community Survey 2014-2018 Estimates

According to the 2010 Census, Trujillo Alto has a population of 41,953. The American Community Survey (ACS) of 2018 estimated that the population of Trujillo Alto had decreased by 7,062 inhabitants. This represents a reduction of 9.44%. Every ward of the municipality experienced a reduction in population, with the highest in

percentage terms being Pueblo, with a 27.19% reduction (673 to 490 inhabitants), and the lowest being Quebrada Grande with a 2.99% reduction (4,376 to 4,245 inhabitants). Further details, regarding the profile of the municipality can be found in Chapter 3, Section 3.2, of the updated 2021 LHMP.

3 Outreach and Public Participation

In order to guide the development of this Plan, Hon. José L. Cruz Cruz, Mayor of Trujillo Alto, appointed the following officials to constitute the Mitigation Planning Committee (henceforth, the Planning Committee). The Planning Committee is comprised by representatives from several departments and citizen involvement with key roles and experience in community planning, public works, and emergency management to serve as key components in the planning process. Please refer to Section 2.5 on the LHMP for more information.

Lcda. Yaridsa Collazo Perdomo	Special Aide	Mayor's Office, Municipality of Trujillo Alto	yaridsacolla@yahoo.com
Radamés Benítez Carmona	Operations Aide to the Mayor	Municipality of Trujillo Alto	ofialcalde@trujilloalto.gov.pr
Juan G. Jacob Greenaway	Director	Office of Planning and Territorial Ordering	juan.jacob@trujilloalto.gov.pr
Cecilia Ruiz Donate	Director	Office of Community Development	cecilia.ruiz@trujilloalto.pr

Name	Position	Agency	eMail
Madeline Perez Berrios	Director	Municipal Emergency Management Office	omme@trujilloalto.gov.pr
Angel L. Quiñones Alemán	Director	Municipal Public Works Office	ncorrea@trujilloalto.gov.pr
Grace M. Ortega Morales	Planning Specialist	Municipality of Trujillo Alto	grace.ortega@trujilloalto.gov.pr
Daysireé Ramos	Director	Municipal Public Relations Office	rptrupilloalto@yahoo.com
Yadira Mercado	Director	Municipal Housing Office	ymercado@vivienda.trujilloalto.pr

The Planning Committee activities included: (1) updating the list of the municipality assets and local critical facilities; (2) updating the status of the previous LHMP mitigation strategies; (3) determine possible new mitigation strategies for the 2021 LHMP; (4) development and implementation of public participation and outreach activities and stakeholders at large such as neighboring municipalities, governmental agencies; (5) announce the municipality’s LHMP efforts to agencies, stakeholders and public feedback for Trujillo Alto’s LHMP 2021 draft version and incorporate such comments on the Plan.

An initial notice was published on a local newspaper (Primera Hora). Said notice informed the public about the first Public Participation meeting to be held in Trujillo Alto on July 29, 2020. A second notice was published regarding the publication of the 2021 LHMP draft version for review providing 20 days period for review, submit comments, and the opportunity to participate in a second community meeting held on December 3, 2020. A draft version of the 2021 LHMP was made available on the Puerto Rico Planning Board’s (PRPB) website (jp.pr.gov).

4 Trujillo Alto’s Risk Assessment

After reviewing the natural hazards identified as priorities on the previous Trujillo Alto’s 2014 LHMP, the Municipal Emergency Response Plan, the municipality’s disaster history, and other literature related to potential future hazards, the Planning Committee identified the following hazards in the 2021 LHMP; (1) Sea Level Rise, (2) Extreme Temperatures, (3) Drought, (4) Earthquakes, (5) Flooding, (6) Landslides, (7) Strong Winds (Tropical Cyclones), and (8) Wildfire. Discussion of these natural hazards are included in the 2021 LHMP’s Chapter 4. In addition, the 2021 LHMP includes a quantitative vulnerability analysis based on the best available data for Trujillo Alto and Puerto Rico accounting for future development to assess mitigation strategies to prevent repetitive and severe property loss.

This assessment served as a key tool for the Planning Committee and the public to identify and prioritize potential mitigation strategies by focusing attention on areas that present the greatest risk of damages to people, critical facilities, and normal municipality operations. The analysis for earthquake, flood,

landslides, and high winds was performed by assessing the potential impacts from each hazard using geographic information system data (GIS).

By ranking each section, the municipality was in position to determine an overall risk classification. It is important to mention that this classification exercise resulted from the municipality’s 2021 LHMP technical risk assessment along with a capability gap analysis and the local community input, which is based on previous natural events experienced by the Planning Committee and the residents and business owners of Trujillo Alto.

Table 3 provides a summary of the risk classification for each identified hazard. Part of the process of completing the following appraisal required input from the community as well as from the Committee. Beyond the risk analysis, this table presents the municipality’s prioritization analysis.

Table 3: Natural Hazard Ranking

Natural Hazard	Risk to people	Risk to facilities	Risk to operations	Classification
Sea Level Rise	1	1	1	Low
Extreme Temperatures	2	1	1	Low
Drought	2	2	1	Moderate
Earthquake/Liquefaction	2	2	2	Moderate
Flooding	3	2	2	High
Landslide	2	2	1	Moderate
Strong Winds/Tropical Cyclones	3	3	3	High
Wildfire	1	1	1	Low

Source: Planning Committee 2019-2020

High=3, Moderate=2, Low=1

Currently, the potential risks with the highest classification or greater impact identified for the municipality are: (1) flooding, (2) strong winds/tropical cyclone, (3) drought, (4) earthquake/liquefaction, and (5) landslide.

A ranking methodology was adopted to develop the mitigation strategies based on these risks as discussed on Chapter 6 and are divided into the following categories: (1) Prevention, (2) Property Protection, (3) Natural Resources Protection, (4) Structural Projects, (5) Emergency Services, and (6) Education and Public Awareness. The strategy category with most mitigation actions is “Structural Projects” with a total of 34 mitigation projects. Flooding and landslides are the natural hazards that are most addressed within the mitigation actions.

5 Mitigation Strategies, Goals, and Action Plan

The municipal capabilities, along with the risk assessment, serve as a foundation for the design, development and implementation of mitigation strategies. Mitigation strategies, found in Chapter 6, consist of a broad amount of local goals and strategies. The local mitigation actions were gathered from

the 2014 LHMP and were incorporated into the current LHMP. This chapter provides information about the assigned implementation mechanisms and target completion dates. The sections in this chapter are designed to make the Plan strategic by identifying long-term goals, and functional, by identifying short term and immediate actions that will guide the daily local decision-making process and project implementation.

Mitigation goals consist of general guidelines that explain what the Municipality of Trujillo Alto wants to achieve in terms of hazards and mitigation. Thus, the goals included in the 2021 LHMP, offer the Planning Committee and the communities a framework for identifying, prioritizing and implementing actions to reduce the risks associated to natural hazards in Trujillo Alto.

Mitigation strategies are activities, projects, measures, or processes that Trujillo Alto will adopt in order to reduce or eliminate risk to people and property from hazards. Consequently, Trujillo Alto reviewed and revised the criteria adopted in the 2014 LHMP to analyze and prioritize potential mitigation strategies for the municipality. In order to developed the actions, the Planning Committee used the following criteria: (1) the potential of the strategy to reduce expected future damages and/or losses; (2) the capacity of the municipality to implement the action within the 5-year cycle of the Plan; (3) support from the public, agencies, municipal departments, amongst others; and (4) the potential of the action to increase resiliency of Trujillo Alto and its residents. Accordingly, the Planning Committee adopted these criteria, the results from the risk assessment, and the feedback from local and neighboring communities to prioritize each mitigation strategy that was contained in this LHMP.

The following summarizes some of the strategies intended to mitigate these hazards:

- Identifying and demolishing abandoned buildings in risk areas.
- Construction of new water drainage to control flooding in different areas of the municipality.
- Restore creeks to their natural state in order to prevent flooding due to obstruction or unsanctioned constructions/modifications.
- Build retaining walls and other structural elements to protect communities at risk of landslides.
- Cleaning and maintenance of existing drainage systems to prevent these from backing up during heavy rains and contributing to flooding.
- Rebuild/refit bridges to allow access to communities in case of hazard events such as flooding/landslide/earthquake.

6 Maintenance to Keep the Plan Current

Chapter 7 details the revision and monitoring process in great extent. The formal maintenance process, identified by the Planning Committee, aims to keep the document viable and current, as it is a living document that shall reflect the hazards and realities affecting its community, and how to plan and prepare ahead in the event of a natural disaster. The plan maintenance process provides the procedures for evaluation and review every third quarter of each fiscal year during its 5-year life cycle. Evaluation will include a review of the mitigation action plan implementation, continued public involvement through the Plan's life cycle, as required by federal legislation. As part of the review process, the members of the Planning Committee. In the event of a major natural disaster affecting the island and/or municipality, an emergency meeting must be scheduled, and the Plan should be updated or amended, as necessary, bypassing the 5-year term. The Committee will coordinate with other municipal dependencies, as needed, to achieve the goals and objectives stated in this LHMP.

Finally, the municipality will promote continued public participation during the plan maintenance by, including, but not limited to (Refer to Section 7.4 of the LHMP):

- Making sure to coordinate meetings between those involved in the Plan maintenance process, which will take place at the beginning of each year and after each natural disaster occurring in the jurisdiction of Trujillo Alto.
- Prepare the Reports of the Plan Progress Analysis, which will be presented and discussed in meetings with the people involved in the Plan maintenance process.
- Review whether there were changes in the Act, regulatory agency regulations, which affect the Plan in one way or another, as well as budget allocations that may affect the development of projects programmed for communities.
- Ensure that applications for funds for the development of the activities described in the Plan to be made by the municipality are included in the budget of the relevant fiscal year.
- Identify opportunities to access funds.
- Establish the program-specific Work Plan, based on the schedule and goals set out in the Plan.

7 Plan Approval and Adoption

The Federal Emergency Management Agency (FEMA) completed review of the Municipality of Trujillo Alto's Hazard Mitigation Plan, based on the standards pursuant to title 44 C.F.R. Section 201 as authorized by the Disaster Mitigation Act of 2000 (DMA2k). The Plan received a satisfactory rating for all required criteria and was approved as approvable pending adoption (APA) on August 31, 2021. Accordingly, the Municipality of Trujillo Alto, adopted said Plan on September 3, 2021, via Executive Order 10, 2021 Series.

Upon receiving the record of adoption from the municipality, FEMA approved the Plan on September 9, 2021, and issued an official approval letter to the municipality, stating that the jurisdiction has adopted said Plan and thus is eligible for FEMA Hazard Mitigation Assistance programs. The approval letter establishes the expiration date 5 years from the date of approval, or until September 8, 2026.
