PRIMERA REUNIÓN DE PLANIFICACIÓN CON LA COMUNIDAD

PLANES DE MITIGACIÓN CONTRA PELIGROS NATURALES
RESILIENCIA PLANIFICADA

JUNTA DE PLANIFICACIÓN

La Junta de Planificación, junto al Municipio de Aguadilla, invitan a los organismos gubernamentales, entidades privadas, dueños de negocios, líderes comunitarios y ciudadanía en general a participar de la 1ª **reunión de Planificación con la Comunidad para la revisión del Plan de Mitigación contra Peligros Naturales.**

Los peligros naturales pueden causar la pérdida de vida y propiedad y tener consecuencias nefastas. La mitigación de riesgos es el esfuerzo de nuestra comunidad por reducir los daños o riesgos ocasionados por peligros naturales mediante el diseño de medidas que reduzcan su impacto.

El Plan de Mitigación contra Peligros Naturales para el Municipio de Aguadilla tiene el propósito de guiar al gobierno municipal en el desarrollo y adopción de estrategias dirigidas al manejo de peligros, tales como inundaciones, huracanes, sequías, deslizamientos, terremotos y otros.

Pre-Posting Notice of Availability of Draft NPDES General Permit for Small Municipal Separate Storm Sewer Systems and Federal Facilities within the Commonwealth of Puerto Rico

Stormwater discharges associated with runoff from Municipal Separate Storm Sewer System within urbanized areas in Puerto Rico

The Environmental Protection Agency (EPA)-Region 2 is issuing this pre-posting notice of a Draft National Pollutant Discharge Elimination System (NPDES) general permit, PRR040000/PRR04000F, for stormwater discharges from small municipal separate storm sewer systems (small MS4) from urbanized areas within the Commonwealth of Puerto Rico to waters of the United States. This draft NPDES general permit establishes Notice of Intent (NOI) requirements, standards, prohibitions and management practices for discharges of stormwater from small MS4's urbanized areas.

The draft permit describes two distinct small MS4s. These are the Conventional municipalities; and Non-Conventional State, Federal and other publicly owned systems; including transportation systems and State flood control pump station. The conditions in the final general permit are established pursuant to Clean Water Act (CWA) Part 402(p)(3)(iii) to ensure that pollutant discharges from small MS4s are reduced to the maximum extent practicable, protect water quality, and satisfy the appropriate water quality requirements of the CWA. The term small MS4 is available in 40 CFR Part 122.26(b). In addition, this term also includes systems similar to separate storm sewer systems and flood management conveyances in municipalities such as military bases, large hospital or prison complexes, highways, and flood control pump stations, and other thoroughfares.

You may download the draft 2022 NPDES Small MS4 General Permit and Fact Sheet from EPA's website: <https://www.epa.gov/npdes-permits/npdes-permits-phase-2-stormwater-program-puerto-rico>. EPA will post the Federal Register Notice as soon as it gets published.
